

# IMPORTANT NOTICE REGARDING SOFTWARE UPDATES AND DOWNLOADS

All Apex Instruments software and firmware are released as a matched pair.

The PC component (software) and the console component (firmware).

The software and firmware are developed and tested as a matched pair.

If downloading to replace a PC make sure you know the version in the console.

Mixed versions can result in unsatisfactory results and corrupted data.

The download file names represent both the software and firmware revisions.

Example of a file name “STM-12B XC-6000 C50723-1009” C50723 is the PC software and 1009 the console firmware

## DO NOT MIX SOFTWARE AND FIRMWARE VERSIONS

If you have any questions regarding software or firmware contact upgrades or downloads
